Sliding Anti-theft

The sliding anti-theft locking system has been made especially for goods storage or exports in containers. Its slidings system a perfect ajustement to container locking bars, so that it is impossible to destroy it without important technical instruments.

The «Chromed Nickel» finish and its protected locking with a screw cap make this anti-theft system durably operational timely speaking as it is protected against bad weather.

Technical characteristics :

- Unit weight : 2,125 kg
- Packaging : per unit or per box of 10 pieces individually packed
