

Safety Sheet

The safety sheet is made to protect your goods during transport. It operates directly for personal safety avoiding packages / boxes collapse at doors opening or during the discharge at destination, or even during different batches pick-up in a consolidation (LCL container). It also allows to separate and identify the different batches for one shipment.

Designed with strong materials and commonly used in the container, it is fixed thanks to its 4 anchoring points in upper and lower lashing rings.

Fastly fitted, easily stored and with a cheap price, the safety sheet is an effective way to avoid any damage due to handling and transportation.

Characteristics :

- Woven polypropylene (PP)
- PP croses straps 50mm with hooks and buckles
- 4 zinc-plated steel hooks
- 2 zinc-plated steel buckles
- Breaking resistance : uniformly distributed load of 1 250kg
- Dimensions : 2 000 (width) x 2 200 (height) mm
- Weight: 1,45kg
- Packaging: per unit or 100 pcs pallet
