

With over 25 years of experience in isolation shipping containers; BJ Services has developed this new innovation patented liner «BJ Liner»

BJ LINER

BJ LINER is an inner pocket designed for shipping containers and is available in two versions:

- 5 FACES (without flooring)

OR

- 6 FACES (with flooring).

Designed to prevent the growth of moisture, it features an inner cotton wool casing and an outer reinforced aluminium with weft and several PE layers.

The innovative fixing system has straps integrated to the ropes passing through each upper lashing ring: the use of double-sided adhesive tape is no longer needed (no cleaning costs after arriving at destination).

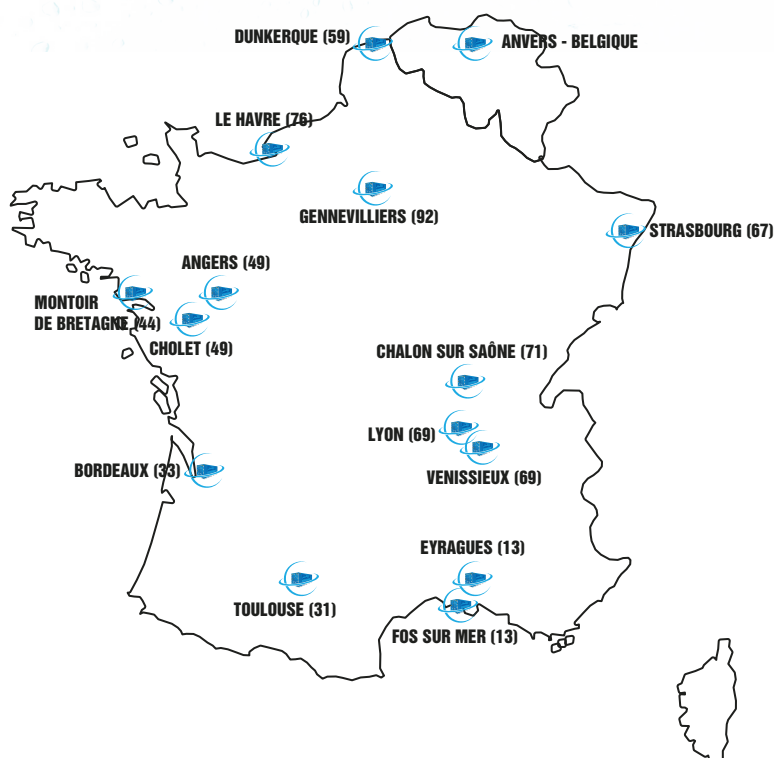

Our highly resistant magnet system also allows for stretching a liner perfectly in a container even after several waiting days before loading.

The BJ LINER provides the best protection to your goods that are sensitive to temperature fluctuations (wine and spirits, baby formulae, baby food, processed dairy food, electronic materials, mineral water etc...)

BJServices has a network of container depots in France, Italy, Spain, Portugal, Belgium, the Netherlands and Germany.

We deliver everywhere in Europe in 4 to 6 working days, and can also deliver worldwide under a maximum of 4 days thanks to our clever compact packaging system.
