

THE HIGH-QUALITY INSULATING MATERIAL FOR SHIPPING

STIFF INSULATING MATERIAL

A RESPONSE TO YOUR NEEDS

The Stiff insulating material is made up of stiff boards extruded from expanded polystyrene.

- Trademark : STYRISOL
- Thickness : 40 mm
- Density : 33Kg/m³
- Material colour : Jaune
- Waterproof : Total / produit insensible
- Certified thermic conductivity : 0.035 W (m.K)
- Thermic resistance : R (m².K/W) : 1.10 (ACERMI N° 03/068/221/2)

Maritime Use

Indoor insulated containers for the exportation of food or chemical product sensitive to sudden temperature change.

(Food : Cold/Hot - Chemical products : point lighting bolt)

Especially made for transportation of wine and spirits.

Panneaux de portes venant fermer le conteneur

Construction

The boards get into each other thanks to male/female profile for a better resistance to heat and a better resistance to land transportation.

The floor boards are resistant to dampness. Finally, the door board are used to close the insulated box after loading. This avoids air leaks often caused by joints in poor conditions.

PACKAGING :

20 ft kit BJ Services: 52.94M/2.097 m

- 38 boards: 2.33m x 0.60m (boards for sides and doors)
